## USER MANUAL RODALI 1.0 for ANDROID

### Installing and Using Rodali on Android

Step 1: Download the appropriate version of Rodali for Android from the “products” link of the site <http://sltdassam.com> using your mobile Internet connection. In case you don't have Internet connection in your mobile, download somewhere else (e. g. your computer) and transfer the *RodaliKeyboard.apk* (or *RodaliKeyboardOld.apk*) file to a folder in your mobile via USB cable or bluetooth.

Step 2: Open the folder in your mobile where you have downloaded or copied the *RodaliKeyboard.apk* (or *RodaliKeyboardOld.apk*) file. Tap(Click) on the file. The following screen may come up. Choose the Package Installer.

Step 3: The following screen appears. Tap Install.

Note: Sometimes you may get a message like "Install Blocked" for application not obtained from Android Market( Google Play Store). In such case you have to change your phone's security settings. Go to Settings>Security>Unknown Source. Check the option 'Allow Installation of non market App". A popup message will come. Tap OK. Now you are ready to install Rodali. After installation complete you may again change your security setting to default.

Step 4: The following screen appears after installation completed. Tap Open.

This is the first layout of the Rodali keyboard. Rodali has total four layouts to access the various letters and symbols. The other layouts can be viewed by using the following buttons shown by the arrows.

NOTE: At any time you can switch to the default Android Keyboard by pressing and holding the Spacebar. You can again come back to “Rodali” by pressing and holding the Spacebar on the default Android Keyboard.
